### Part II -

Below are certain forecast parameters (and symbols) that you would manipulate once in IGR (or 'matrices'). Write a very brief definition of each listed below and pay particular attention to describing the temporal duration of each (**note:** not every element of all possible elements is listed).

**Mx\Mn -** The maximum (6am-6 pm LT) and minimum (6 pm-6 am LT) temperatures in deg (F) for daytime and nighttime periods, respectively.

**Temp -**

**Dew -**

**Obvis (how many hours valid ?) -**

**Tstm -**

**Tint -**

**Pcpn1,2,3 -**

**Ints1, 2, 3 -**

**Mx1,2 -**

**Symbols -**

**: -**

**> -**

**?? -**
